### Asperger syndrome from childhood into adulthood

Tom Berney

**Abstract** Asperger syndrome, a form of autism with normal ability and normal syntactical speech, is associated with significant social difficulties and restricted interests. It is often misdiagnosed as autism or other disorders, and we are beginning to recognize the extent of its impact in adulthood. The article reviews the diagnosis and treatment of Asperger syndrome in childhood and adolescence, focusing on the social difficulties, including mental disorder, offending and mental capacity. It also describes the broader, non-psychiatric implications of Asperger syndrome, including employment, social support and practical arrangements.

This review focuses primarily on clinical issues; more academic aspects have been reviewed by Volkmar et al. (2004).

#### Diagnostic classification

As in autism, Asperger syndrome shows impaired reciprocal social interaction and restricted, repetitive patterns of behavior, interests, and activities. Unlike autism, intellectual ability and language development are normal. In DSM-IV, the emphasis on current presentation of symptoms has led to the proposal that DSM-IV require their presence from early life. The latter is problematic, as it is not clear how long it is necessary to define a disorder that would be an alternative to autism. The question of whether there is a need to distinguish many of the cases described by Asperger from autism has been raised. Gillberg and colleagues proposed a set of diagnostic criteria for Asperger syndrome based on original clinical descriptions (Lettam et al., 2003). Seeking to describe the nub of this syndrome, Asperger's original description was modified in 1984 to distinguish its innate social distance from the rest of society from the social withdrawal seen in autism. The concept of Asperger's syndrome was elaborated by van Kravet in 1983. Long-term follow-up studies of children with Asperger's syndrome have been reported (e.g., Gillberg, 1998). There have been different meanings of the term over time and it has been included in the group of autistic spectrum disorders.

Tom Berney is a consultant in developmental psychiatry and the Honorary Head of Paediatric Psychiatry at the Royal Hospital for Sick Children, Edinburgh. He is a member of the Royal College of Psychiatrists and the Royal Society of Medicine. Tel: +44 131 455 9991 ext. 1.

# Asperger's Syndrome in Gifted Individuals

by Lynnette M. Henderson

**A**sperger's Syndrome (AS) is a pervasive developmental disorder on the autism spectrum characterized by social deficits, relatively normal language and cognitive development, and the presence of idiosyncratic interests.

Repetitive speech or actions and pedantic speech, often concerning the person's intense interests in a restricted subject matter, and clumsiness may co-occur (Myles & Simpson, 1998; Klin, Volkmar, & Sparrow, 2000). AS may occur in gifted individuals.

(ASSQ) – Rev (2011)

Name of child.....	Date of birth .....				
Name of parent.....	Date of rating.....				
This child stands out as different from other children of his/her age in the following way:					
	No Not at all	Yes All the time			
1. is old-fashioned or pretentious	<input type="radio"/>				
2. is regarded as an 'eccentric professor' by the other children	<input type="radio"/>				
3. lives somewhat in a world of his/her own, with restricted idiosyncratic intellectual interests	<input type="radio"/>				
4. accumulates facts on certain subjects (good rote memory) but does not really understand the meaning	<input type="radio"/>				
5. has a literal understanding of ambiguous and metaphoric language	<input type="radio"/>				
6. has a deviant style of communication with a formal, fuzzy, 'old fashioned' or 'robot like' language	<input type="radio"/>				
7. invents idiosyncratic words and expressions	<input type="radio"/>				
8. has a different voice or speech	<input type="radio"/>				
9. expresses sounds involuntarily, clears throat, grunts, snucks, cries or screams	<input type="radio"/>				
10. is surprisingly good at some things and surprisingly poor at others	<input type="radio"/>				
11. uses language freely but fails to make adjustments to fit social contexts or the needs of different listeners	<input type="radio"/>				
12. lacks empathy	<input type="radio"/>				
13. makes naive and embarrassing remarks	<input type="radio"/>				
14. has a deviant style of gaze	<input type="radio"/>				
15. wishes to be sociable but fails to make relationships with peers	<input type="radio"/>				
16. can be with other children but only on his/her terms	<input type="radio"/>				
17. lacks best friend	<input type="radio"/>				
18. lacks common sense	<input type="radio"/>				
19. is poor at games: no idea of cooperating in a team, prefers 'own goals'	<input type="radio"/>				
20. has clumsy, ill-coordinated, ungainly, awkward movements or gestures	<input type="radio"/>				
21. has involuntary face or body movements	<input type="radio"/>				
22. has difficulty in completing simple daily activities because of compulsion repetition of certain actions or thoughts	<input type="radio"/>				
23. has special routines: insists on no change	<input type="radio"/>				
24. shows idiosyncratic attachment to objects	<input type="radio"/>				
25. is bullied by other children	<input type="radio"/>
